RedisBloom 1.0 release notes

Requirements

RedisBloom v1.0.3 requires:

- Minimum Redis compatibility version (database): 4.0
- Minimum Redis Enterprise Software version (cluster): 5.0

v1.0.3 (December 2017)

This contains a single fix, issue #19.

From this version onwards, EXISTS/MEXISTS returns 0 if the (Redis) key does not exist in the database. Earlier versions returned an error.

v1.0.2 (November 2017)

This fixes a build issue (fixed s3 config in circle yaml).

v1.0.0 (September 2017)

This is the first GA release of ReBloom.

Updated: December 14, 2021
