RedisInsight v1.12, May 2022

1.12.0 (May 2022)

This is the General Availability Release of RedisInsight 1.12 (v1.12.0)!

1.12.0

Headlines:

- **Authenticate database users**: Ask for database username and password
- Support for `GRAPH.RO_QUERY` command in RedisGraph tool.
- Support for variable CPU in RedisAI tool.

Full Details

Core

- **Authenticate database users**: Ask for database username and password
  - If enabled, each time a user attempts to open a database previously added to RedisInsight, a form to enter username and password is displayed. This form displays also if a user is idle for a configurable amount of time.
- Fix major container vulnerabilities.
- Decrease Docker image size by discarding unnecessary contents.

Streams

- Fix slowdown and crash while loading large streams data.
- Use UTC time for stream id timestamp.

Graph

- Allow scanning for more keys.
- Add support for `GRAPH.RO_QUERY` command.

Browser

- Fix **Delete key** dialog box that displays when no key is selected.

RedisAI

- Add support for variable CPU number.
