RedisInsight v1.4, April 2020

This is the General Availability Release of RedisInsight 1.4 (v1.4.0)!

Headlines

- Support for Redis 6, Redis Enterprise 6 and ACLs
- Improve CLI capabilities with removed command restrictions
- Full screen support in Graph, TimeSeries and RediSearch

Full details:

- Features
  - Core:
    - Added support for Redis 6 + RE6 and authentication using ACL
    - Added Full screen support for Graph, TimeSeries and RediSearch.
    - Improved UI consistency (colors and styles) in Graph and Timeseries
  - CLI:
    - Removed the command restrictions, unless a command is specifically blacklisted.
    - Command responses are displayed in exactly the same way as in `redis-cli`
  - RedisGraph:
    - Optimized performances when getting nodes relationships (edges) from user’s queries
  - Stream:
    - Improved UX when defining the timing range of events to be filtered

- Bug Fixes:
  - Core:
    - Fixed issue when connecting to Redis Enterprise with a password using a special character
  - Stream:
    - Fixed ability to properly visualize all events

Known issues

- Core:
  - Authentication to Redis 6 OSS in cluster mode is not supported yet

- CLI:
  - Blocking commands are not supported
  - Commands which return non-standard streaming responses are not supported: `MONITOR`, `SUBSCRIBE`, `PSUBSCRIBE`, `SYNC`, `PSYNC`, `SCRIPT DEBUG`
